

Cumulative Proof of the Value of Iodine-Medol in Sepsis Prevention in Mines, Factories, Workshops, &c.

The number of Collieries, Mines, Factories and Workshops—now exceeding 10,000—where Iodine-Medol has become the regular dressing to employ in all First-Aid Work for cuts, wounds, burns, etc., grows steadily larger. The letters printed in this pamphlet give abundant evidence of the reasons for this, whilst the lists of users grouped under their trade headings show that, where dangerous work is carried on as well as where large numbers are employed, Iodine-Medol is welcomed as a valuable addition to regular First-Aid equipment.

The following opinions received from Works where Iodine-Medol is regularly used, all prove the special value that this preparation possesses in First Aid work.

The Briton Ferry Collieries, Ltd., Colliery Proprietors, Port Talbot, S. Wales :—

"We are pleased to inform you that since using your Iodine-Medol, we have not had a single case of septic poisoning amongst our workpeople, although these cases were of frequent occurrence before your preparation was brought into use."

Messrs. Charles Ross, Ltd., Engineering Works, Sheffield :—

"We have now used Iodine-Medol at our Works for some time and find same to be an excellent preparation for treating minor injuries, and have not had a single case of blood poisoning from cuts and lacerations since we commenced using it. We think it an absolute necessity in any Works, and should be greatly used."

The General Manager, Pilsley Colliery Co., Ltd., nr. Chesterfield :—

"We have had your Iodine-Medol in use at these Collieries for about two years, and find this very efficacious for the first treatment of small wounds: it has desirable Antiseptic properties, and the method of packing is very suitable for first-aid treatment about a Colliery where dust and dirt invariably exist, and making it unnecessary to handle any such dressing for first-aid application. We are pleased to add that our cases of septic wounds are showing a decrease on former numbers since we used this in our Ambulance boxes."

Messrs. Roberts Capsule Stopper Co., Ltd., London, S.E. :—

"Since we introduced your Iodine-Medol into the factory, we have not had a single case of septic poisoning on our accident list. At one time the loss of time resulting from slight cuts and scratches becoming septic was alarming, and we were very anxious to find a simple and easy method of treating these slight cuts. We think Iodine-Medol has given a solution. Our method is to keep a supply of tubes in the hands of the respective foremen of each department, so that any employee can have a tube by asking for it."

The Manager, Plennmeller Collieries, Ltd., Northumberland :—

"I have found Iodine-Medol a very effective first-aid for cuts, scratches and also large wounds. We have a very wet pit with a bad water; and since using your preparation there have not been so many compensation cases of septic poisoning."

Messrs. Charles Neil & Co., Ltd., Tool Manufacturers, Sheffield :—

"We are now using your Iodine-Medol throughout our works as an antiseptic dressing, and have pleasure in advising you that we have practically eliminated septic wounds as a result. Apart from its antiseptic qualities, however, its capacity for healing has made a marked impression on our first-aid department."

The following lists of Firms who use Iodine-Medol as the regular routine treatment in their First-Aid Departments have been grouped under general trade headings which show that this preparation has firmly established its value in dangerous trades as well as where large numbers of workers are employed.

The Secretary, The Ratner Safe Co., Ltd., Bromley-by-Bow, E.3:—

“ We beg to say that since we purchased your Iodine-Medol it has been used from twenty to thirty times every week in connection with minor cuts, and we are glad to say that since we had it there have been no cases of septic poisoning in the Works.”

The Newstead Colliery Company, Ltd., nr. Nottingham:—

“ We beg to inform you that Iodine-Medol is giving every satisfaction. Its use in the form of tubes is very convenient for pit work and a marked improvement on liquids. Minor scratches and abrasions are a very frequent occurrence, and judging by the number of tubes used from our Ambulance Boxes down the pit, our men evidently find the use of Iodine-Medol beneficent.”

The Thompson & Norris Mfg. Co., Ltd., Corrugated Paper Manufacturers, London, W.3:—

“ We have found Iodine-Medol very useful in conjunction with our First-Aid Outfit, and use it on most of the slight cuts and abrasions that occur in a Manufacturing Business.”

Messrs. Turton Brothers & Matthews, Ltd., Steel Manufacturers, Sheffield:—

“ In all departments of our works Iodine-Medol is kept in a convenient place for immediate use in case of accidents. Our employees have instructions to use it, no matter how trivial the wound, and the results in all cases have been quite satisfactory.”

Yorkshire Dyeing & Proofing Co., Ltd., Dyers, Middleton:—

“ We have found Iodine-Medol is particularly suitable for Works in our line of business, as many minor accidents occur which would have serious consequences if an effective antiseptic were not applied at once.”

The Apex Steel Company, Limited, Steel Manufacturers, Sheffield:—

“ We beg to state that your Iodine-Medol has proved to be a very satisfactory addition to our various ambulance cases in the Works, and we are using regularly for all external cuts or wounds.”

Messrs. Edgar Allen & Co., Limited, Steel Works, Sheffield:—

“ We have been using your Iodine-Medol for some time and we have found it to be very beneficial in all cases in which it has been used, particularly in the case of superficial burns for which it has proved of great value.”

Messrs. Alfred Beckett & Sons, Ltd., Cast Steel Manufacturers, Sheffield:—

“ We are using the Iodine-Medol supplied by you as an antiseptic dressing, and find its capacity for healing has made a good impression on our First-Aid Department.”

The Cleveland Magnesite & Refractory Company, Limited, Brickworks, Eston, Yorks:—

“We greatly appreciate the amount of satisfaction we have received by using your ‘Iodine-Medol.’ It supersedes anything we have used, and it is our intention to continue to use it.”

Messrs. B. G. Cope & Partner, Ltd., Leather Goods Manufacturers, Walsall:—

“Your Iodine-Medol has been most satisfactory; in particular two severe cuts healed up remarkably soon, and enabled the workers to continue their employment, as very little pain or uneasiness was felt following the application.”

Messrs. John Charles & Sons, Building Contractors, Newport, Mon.:—

“In no case has a cut or wound turned poisonous after treatment with your preparation, and it has also been proved that good healing powers are possessed by the Iodine-Medol.”

Tramways Manager, Croydon Corporation Tramways, Thornton Heath, Surrey:—

“I am pleased to inform you that your ‘Iodine-Medol’ is most satisfactory, and we are now using it in preference to Tincture of Iodine; the effect of its application is very soothing, and our employees appreciate its use.”

Messrs. W. Gilbertson & Co., Ltd., Steel, Tinplate & Galvanizing Works, Pontardawe:—

“Having used your Iodine-Medol in our Ambulance Room, we are pleased to say that it performs all that you claim for it, and beg to testify to its soothing properties and efficient results. Workmen are very much impressed and are enquiring where they can obtain same. Have instructed local Chemist to stock same.”

Messrs. George Hargreaves & Co., Collieries, Accrington:—

“We beg to state that your Iodine-Medol preparation has been found very satisfactory in use, and we feel certain it has been the means of reducing our accident claims.”

Messrs. Horsfall & Bickham, Ltd., Manufacturers of Card and Reed Wire, etc., Manchester:—

“We are glad to say that we are using Iodine-Medol in our First-Aid Department and it has proved very satisfactory. In fact, in one or two obstinate cases we have known it to effect a cure where the ordinary treatment has failed.”

Messrs. Hy. Innocent & Son, Ltd., Drop Forging Manufacturers, etc., Sheffield:—

“We find your Iodine-Medol very satisfactory and better than the liquid Iodine we had always used.”

The Jawcraig Coal Company, Limited, Colliery, Jawcraig, by Falkirk :—

"We have much pleasure in stating that Iodine-Medol has given every satisfaction as a first-aid dressing, and we are certain that it has helped to reduce the time lost owing to minor injuries."

Messrs. A. A. Jones & Shipman, Ltd., Manufacturers of Modern Machine Tools, Leicester :—

"We have pleasure in informing you that the use of your Iodine-Medol has given every satisfaction in our Works. As a matter of fact, our employees have shown a marked preference for this dressing as against that of other kinds."

Messrs. John Lang & Sons, Ltd., Lathe Manufacturers, Johnstone :—

"We consider Iodine-Medol one of the finest Antiseptic dressings we have ever used, and it gives complete satisfaction wherever applied."

Messrs. Negretti and Zambra, Opticians and Scientific Instrument Makers, Barnsbury, London, N. :—

"We have used your antiseptic dressing Iodine-Medol in place of Friar's Balsam and Iodine for the treatment of minor cuts, and find your preparation quite satisfactory, and preferred by the injured person to the old treatment."

The Barry Graving Dock and Engineering Co., Ltd., Barry Dock :—

"We are pleased to advise that we have found the results obtained through the use of Iodine-Medol perfectly satisfactory. We have used it chiefly for burns, in which cases it has always proved very beneficial."

Messrs. Martin Winn, Ltd., Steel Manufacturers, Darlaston :—

"We have found your antiseptic, Iodine-Medol, in every way successful. Several badly fested wounds have been treated with Iodine-Medol, and in each case the treatment has been entirely satisfactory."

The Welfare Supervisor of Messrs. William Goodacre & Sons, Engineers, Victoria Docks, E. :—

"We have been using Iodine-Medol in our Ambulance Room and find it in every way satisfactory. It is a splendid antiseptic and the workers particularly appreciate its soothing properties."

Messrs. John Tann, Ltd., Safe Makers, London, E. :—

"We have used your product, Iodine-Medol, in the First-Aid Department at these works, and have pleasure in stating that we have found it to give most satisfactory results when used for cuts, burns, and light injuries."

Ambulance Supt., Messrs. Spear and Jackson, Ltd., Steel Tool Makers, Sheffield :—

"I have put Iodine-Medol to a test, making sixty applications from one tube. I find it a good antiseptic, and have advised my firm to use it regularly."

Municipal Authorities.

No greater proof of the value of a preparation for First-Aid Work can be given than its adoption by a Public Authority. Naturally, the Medical Department of any Public body will convince itself of the fitness of the preparation for the work to be done before allowing it to be purchased. The following are some of the Public Authorities that are using Iodine-Medol in First-Aid Work amongst their employees.

Why Iodine-Medol prevents Septic Poisoning

IODINE-MEDOL is a combination of two well-known and powerful germ destroyers, namely, Iodine, which is universally known, and Hycol—a highly refined coal-tar derived antiseptic. These two antiseptics are compounded in a special non-lardaceous ointment base, which has the physical property of melting at blood heat and emulsifying with the secretions of the skin, thereby ensuring penetration, by absorption, to the underlying tissues.

By this process of absorption the antiseptics are carried right down by natural means to the most hidden recesses of a wound, displaying their germicidal action not only on the surface of the wound but also in the underlying tissues, thus ensuring the destruction of any germs which may have become deeply embedded in a wound as well as those resident on the surface. In this way a state of complete asepsis in the surrounding tissues is secured, and healing is able to proceed unhindered.

Furthermore, IODINE-MEDOL possesses valuable negative properties inasmuch as the Iodine as combined in IODINE-MEDOL does not stain or burn, and, in contrast to Tincture of Iodine, may be applied to wounds of large area without shock to the nervous system of the patient. In this connection it is interesting to note that it has frequently been found that a painful dressing, such as Tincture of Iodine, has often led a slightly injured worker to delay or neglect altogether to report for treatment, a course too often followed by serious complications necessitating lancing and poulticing before the infection can be removed.

The value of IODINE-MEDOL in the prevention and reduction of septic conditions in cuts, burns and skin injuries, is proved not only by the immunity which it confers against risks of septic troubles but also by the rapidity with which healing takes place under its influence.

IODINE-MEDOL is packed in screw-capped tubes, a packing which ensures its freedom from contamination and enables application to be made direct from the tube on to the wound without intermediate swab or brush, an unhygienic procedure which in addition frequently causes absorption and thereby wastage of more of the antiseptic than is actually applied to the wound.

This leaflet gives ample proof of the claims made for IODINE-MEDOL, yet it necessarily gives but a small selection from the accumulated evidence that has come from the many thousands of industrial establishments where IODINE-MEDOL is regularly employed in First-Aid work.
